Summary

I'm a **B.Tech Computer Science** student with a passion for **UX/UI design**. Through my studies and **Google UX Design certification**, I've learned to blend technical skills with a deep understanding of users' needs to create designs that are both functional and enjoyable to use.

I'm especially proud of a **personal project** where I redesigned the **Prime Hydration website**, which gave me hands-on experience in everything from **wireframing** to **prototyping**. It was exciting to see how small design changes could make a big impact on the user experience, and it solidified my love for the design process.

I enjoy using tools like **Figma** to bring ideas to life and love collaborating with others to refine and improve designs. I'm always looking to grow and learn, and I'm excited about the opportunity to use my skills to create digital experiences that people love to interact with.

Education

Babu Banarsi Das University
Computer Science Engineering

B.Tech

Coursera

UX/UI Design Certification Course

Projects

Personal Project

Enhanced User Flow & Modern Experience

 <https://youtu.be/GUaZoo-9Mv8>

Redesigned the official Prime Hydration website to improve user experience and engagement.

Skills

Figma

Framer

Prototyping and Wireframing

User Research and Usability Testing

Accessibility and Responsive Design

Interests

Sketching

Passionate about using sketching as a tool to visualize and iterate on UI concepts, creating wireframes, and exploring design solutions in the early stages of the design process

Certifications

Google UX Design Certificate
